

Debem Midgetbox Air Operated Diaphragm Pump Dosing Pump

The Debem MIDGETBOX Air Operated Diaphragm Pump is an Italian manufactured AODD pump, which as its name describes is one of the smallest and highest performing pumps in the market. Thanks to its extremely compact design makes it an ideal air operated double diaphragm pump where the installation doesn't allow for the size of standard alternatives.

- ✘ The MIDGETBOX AODD pump's low flow rate makes it ideal for small volume transfer and dosing pump applications particularly popular in the chemical and industrial markets. Being ATEX approved to Zone 1 or 2 makes them also suitable for potentially hazardous applications.

The Debem range of air operated diaphragm pumps are what we like to describe as "Fit and forget" solutions. Thanks to their low maintenance, long service life and little manual intervention required, the air operated diaphragm pumps can just be left to do their job.

Specifications	Details
Outlet	4
Inlet	1
Max Head	80 M
Max Flow Rate	5 lpm
Max Viscosity	50000 cP
Maximum operating temperature	65°C
